

FIELD ASSIGNMENT ENVIRONMENTAL MESSAGE (IAP) - ICS 204E			
Incident Name: OTCW Oil to Lake		Date Prepared: 3/26/14 Rev 3/27/14	
Incident Location: Whiting Business Unit		Operational Period:	
		Date	Time
		3/26/14	00:00
		End: End of Response	Until revoked or revised
ORGANIZATIONAL LEVEL:		FIELD ASSIGNMENT NO.	
<input type="checkbox"/> On-Scene Commander: Bob Allendorfer/Linda Wilson		<input type="checkbox"/> Task Force	
<input checked="" type="checkbox"/> Operations Section Chief: Nick Gill/Ralph Alvarez		<input type="checkbox"/> Strike Team	
<input checked="" type="checkbox"/> Branch: All: Shore; Water; 6 Sep			
<input type="checkbox"/> Division/Group:			
<input type="checkbox"/> Task Force/Strike Team: Veolia/KM Vacuum Trucks			
SPECIFIC ENVIRONMENTAL CONCERNS AND AVOIDANCE/MITIGATION MEASURES			
Environmental Concerns:		Avoidance/Mitigation Measures:	
Handling of Vac Truck material containing solids.		Oil-containing solids must not be transferred from Lakefront to Cat Pad. Material removed from shore should be expected to contain solids. If solids are expected in vacuum truck, then vacuum truck operations must utilize vacuum box to collect material. Vacuum box may then be dewatered to the Lakefront sewer system	
Volume of material recovered		For each vacuum truck recovering liquid material, complete the following: 1. Document which company owns the truck and truck ID 2. Record date of load 3. Vacuum truck operator to drain recovered liquids from vacuum truck into Lakefront bar screen until oil observed at drain. • This will be accomplished by periodically sampling the water being discharged. • A bucket staged nearby will be used for this purpose. 4. Once water removed from truck – vacuum truck operator to measure amount of oil remaining in drum (via outage or other appropriate method) 5. Record outage or calculated volume of oil recovered in the Spill material Tracking Event Log. 6. Return above Log to Planning Section – Technical Lead at the end of every shift and Documentation Section.
